

GoDrive

by GO ANYWHERE™

An Enterprise File Sync and Sharing solution for employees and trading partners

Collaboration Without Compromise

GoDrive by GoAnywhere™ is an on-premise solution that provides Enterprise File Sync and Sharing (EFSS) services for your employees and partners. **Starting with 10 FREE Users**, GoDrive files and folders are easily shared between users with advanced collaboration features including file revision tracking, commenting, trash bin, media viewing and synchronization with Windows, Apple and Android devices.

See How Easy It Is!

Sharing files is simple with GoDrive. Employees can quickly invite authorized users to work with their shared folders and files using the provided browser interface. Collaboration features include:

Share Files

The screenshot shows the GoAnywhere Web Client interface. The top navigation bar includes Dashboard, GoDrive, Secure Mail, Secure Folders, My Account, Activity Report, and Invite Users. The main content area displays a file list with columns for Name, Last Modified, and Size. The file list includes folders like Case Studies and Security & Compliance, and files like Corporate_Overview.pdf, Customer_List.pdf, GoAnywhere-on-Automatic.jpg, Medical_Cost_Savings.xlsx, and Secure_Network_Diagram.docx. A sidebar on the left shows the My Workspace tree with folders for GoDrive, Case Studies, Security & Compliance, Trash Bin, and Shared Docs. A Disk Usage section shows 30% usage (29.64 MB of 100 MB).

- Easily drag-n-drop files between the desktop and GoDrive folders
- Automatic email invitations to shared users
- Enter file comments, as well as review comment history from other users
- Organize files into user-defined folders and subfolders
- View thumbnail images of graphic files
- Search for files and folders

Monitor Sharing

- User can monitor shared files via activity streams
- Receive email notices when shared files are downloaded or modified by others
- View and recover prior versions of files

Manage Access

- Lock files restricting access
- Revoke sharing of folders and files as needed
- Place files into a recycle bin for future recovery
- Manage shared folder access with granular permissions
- View history of when files are downloaded, uploaded and modified

GoDrive by GoAnywhere runs on multiple platforms including Windows, Linux, AIX, IBM i, Solaris and UNIX

How GoDrive Works

These screenshots illustrate what administrators see when using GoDrive.

Administration

Included with GoAnywhere MFT™, GoDrive provides a browser-based interface for administrators to easily manage users, security settings and shared folders.

- Set disk quotas and view disk usage
- Deactivate and wipe GoDrive folders from stolen or lost end-user devices

Security

GoDrive provides end-to-end encryption for sensitive files. Since no files are stored in the cloud, your organization maintains local control to meet compliance requirements.

In addition to the full complement of security features in GoAnywhere MFT, GoDrive includes:

- The ability to set granular permissions at the folder, subfolder and individual file level
- Dual-factor PIN authorization for device registration
- AES 256-bit encryption on files synced to GoDrive devices

Logging and Reporting

Capturing detailed audit log information and exporting for reporting purposes is a cornerstone of GoAnywhere MFT. GoDrive logs each time a file is uploaded, downloaded, edited, shared, commented on, and deleted.

Sync Client

The GoDrive Sync Client for Windows and Macintosh will synchronize your files from the GoDrive folder on your workstation with the GoAnywhere server. Files automatically appear on each of your registered iPhones, iPads, and Android phones and tablets, as well as the Web Client, allowing you to access your files from any internet connected computer.

Sharing files with others is a snap using GoDrive. We even give you 10 FREE Users to get started. No strings attached!

The screenshot shows the 'GoDrive Settings' window with tabs for 'General', 'Device Policy', 'Media Viewer', and 'Thumbnail'. The 'Registration' section includes: 'PIN Verification Required' (checked), 'PIN Length' (6), 'Admin Approval Required' (checked), 'Notify GoDrive Managers' (checked), and 'Notify Additional Email Addresses' (GoDrive_Admin@example.com). The 'Offline Access' section includes: 'Enabled' (checked), 'Limit Time Offline' (checked), 'Maximum Offline Time' (1 Days), 'Password Required' (checked), 'Reverify Password' (checked), and 'Time Interval To Reverify' (4 Hours).

The screenshot shows the 'GoDrive Log' window with search filters for 'Date Range' (Mar 10, 2015 09:39 to Mar 10, 2015 09:40), 'User', 'Event Type' (File Downloaded), 'Local IP', 'Session ID', 'File Name', and 'System Name'. Below the filters is a table of log entries:

Start Time	Event Type	Success	File Name	File Size	User
3/10/15 9:39:38 AM	File Downloaded	✓	HIPAA_Compliance.pdf	4806845	kharris
3/10/15 9:39:36 AM	File Downloaded	✓	Customer_List.pdf	258794	kharris
3/10/15 9:39:36 AM	File Downloaded	✓	GoAnywhere_case_study.pdf	978419	kharris
3/10/15 9:39:36 AM	File Downloaded	✓	GoAnywhere_Care_Guide.pdf	558172	kharris
