GO ANYWHERE
Managed File Transfer

Simplify, Automate and Secure File Transfers

GoAnywhere MFT is a Managed File Transfer solution which provides centralized control and auditing of file transfers and workflows for the enterprise. With its comprehensive features and intuitive interface, GoAnywhere will reduce operational costs, improve the quality of data transmissions and meet stringent compliance requirements.

GoAnywhere MFT can be used for a variety of file transfer needs including workflow automation, ad-hoc file transfers and document collaboration. It can simplify system-to-system, user-to-system and user-to-user file transfers.

Connect to almost any system or trading partner using standard protocols including SFTP (SSH), SCP, FTP/S (SSL/TLS), HTTP/S, SMTP, POP3, IMAP and AS2. GoAnywhere MFT also supports Open PGP and ZIP with AES encryption for securing sensitive documents.

CRYPTO
COMPLETE™

Automated Field, File and Backup Encryption

Crypto Complete™ protects sensitive data using strong encryption, integrated key management, and auditing. Crypto Complete allows organizations to encrypt database fields, backups and IFS files quickly with its intuitive screens and proven technology. This innovative solution is vital for protecting confidential information and expediting compliance with PCI DSS standards, federal regulations (e.g. HIPAA, Sarbanes-Oxley) and state privacy laws.

SURVEYOR/400™

Graphical Productivity Suite

Surveyor/400™ provides an intuitive graphical interface for efficiently working with your IBM i database files, spooled files and IFS files. Surveyor/400 is so powerful and user-friendly, both IT personnel and end-users will immediately benefit from its comprehensive features.

RPG
TOOLBOX™

Modernizes RPG Source Code

RPG Toolbox™ effectively converts RPG source code to modern RPG IV syntax, either to /Free-form or fixed format. It also includes dozens of valuable productivity tools for RPG developers. An RDi plugin is available for converting source with a click of the mouse.
