GoAnywhere Now Certified for Microsoft Server 2012

Omaha, NE – September 11, 2012

Linoma Software has announced its GoAnywhere suite of secure file transfer products [has been certified](#) to work with Microsoft Server 2012. This certification offers customers assurance of enhanced security as well as innovative user interface features and reliability improvements.

The GoAnywhere suite is comprised of [GoAnywhere Director](#), [GoAnywhere Services](#) and [GoAnywhere Gateway](#).

“Our ISV community is alive with innovation, and we’re committed to helping our partners drive the next generation of software experiences,” said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. “Adding compatibility for the latest Microsoft technologies helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies.”

GoAnywhere Director performs ETL (Extract, Transfer, and Load) and secure managed file transfer (MFT) functions, while GoAnywhere Services acts as a [secure FTP server](#) for trading partners who need to send files to the organization. GoAnywhere Services also includes a [secure mail](#) option with Outlook 2010 to send files securely using a unique, encrypted link. GoAnywhere Gateway is a forward and reverse proxy that masks internal network servers and keeps security information out of the DMZ.

The [NIST-certified FIPS 140-2](#) module available for both GoAnywhere Director and GoAnywhere Services also ensures that files are secure and encrypted to meet the high-security requirements of the U.S. government.

“Linoma Software is excited to certify our GoAnywhere applications on Microsoft Server 2012,” said Bob Luebbe, Chief Software Architect at Linoma Software. “Making our application compatible with Microsoft Server 2012 helps us offer our customers compelling benefits, including improved security and reliability features, tools to keep them securely connected to data stored on their networks, and sophisticated management features.”

The GoAnywhere suite of applications earned the “Certified for Windows Server 2012” after successfully passing a number of tests in a Windows Server 2012 Hyper-V environment for stability, security and proper operation in a virtualized Windows Server 2012 environment.

About Linoma Software

Founded in 1994, [Linoma Software](#) provides innovative solutions for managed file transfer and data encryption. With a diverse install base of more than 3,000 customers around the world, Linoma's focus on research and development, as well as customer service and support, contributes to its leadership in the software industry.

About GoAnywhere™ Managed File Transfer Suite

GoAnywhere™ is a managed file transfer and secure FTP solution that will streamline and automate file transfers with trading partners, customers, employees and internal servers. Enterprise level controls and detailed audit logs are provided for meeting strict security policies and compliance requirements including PCI DSS, HIPAA, HITECH, SOX, GLBA and state privacy laws.

GoAnywhere can be installed on most platforms including Windows®, Linux®, IBM® i (iSeries®), UNIX®, AIX®, and Solaris®, and supports popular protocols including FTP, SFTP, HTTPS, and AS2. Optional modules include Secure Mail for ad-hoc file transfers and NIST® certified FIPS 140-2 validated encryption.

The GoAnywhere solution is comprised of three products:

- *GoAnywhere Director*™ - Managed File Transfer (scheduler, workflow automation, file encryption, etc.)
- *GoAnywhere Services*™ - Secure FTP Server and optional Web Server
- *GoAnywhere Gateway*™ - DMZ Gateway with Reverse and Forward Proxy
